

The Neurofeedback Advocacy Project

Dear Biden-Harris Transition Team,

On behalf of the Neurofeedback Advocacy Project, I am pleased to submit this letter of support for Patrick J. Kennedy's appointment as the next Director of the ONDCP. I am very much in support of his statement that "Regarding addiction treatment, care must be covered by private health insurers, and mental health must be a key component of addiction treatment."

I come to these views both as someone who served on the Board of Directors of Kaiser Foundation Hospitals & Health Plan for 30 years, and also as someone who, as Co-Director of the Neurofeedback Advocacy Project, is very familiar with the challenges involving the implementation of access by those most in need to more effective and cost-efficient mental health care resources. From both perspectives, it is encouraging to me to read of Rep. Kennedy's interest in bringing his background, experience, and perspectives to this issue in a way that ensures it may receive the high-profile attention it deserves and our nation so urgently needs.

Sincerely,

Henry M. Kaiser, PsyD MBA
Co-Director, the Neurofeedback Advocacy Project
